

# KPMF/HPF SERIES WATER SANITIZATION

Did you know that stagnant water and boiler alert conditions in plumbing or equipment may cause excessive amounts of heavy metals and pathogens? High concentrations of these contaminants can damage your equipment and negatively affect the taste, odor, and quality of your ice and beverages. Utilizing KineticoPRO's Sanitization Cartridge, paired with your preferred sanitization or descaling agent, helps to ensure that your plumbing is sanitary.

## FEATURES & BENEFITS

- For use with existing Selecto/KineticoPRO SMF/KPMF/HPF filtration systems
- Used for the introduction of sanitization or descaling agents into water lines & equipment
- Quick & easy way to help clean and maintain your equipment
- Helps to remove unwanted contaminants caused by stagnant water
- Quick cartridge change-out process

**NOTE:** After you have successfully sanitized your plumbing lines, please be sure to install **NEW** water filter cartridges.

SMF/KPMF  
Sanitization Cartridge

HPF  
Sanitization Cartridge
